Zouani, A, Bui-Quoc, T, and Bernard, M: Optimal design of a disk-shaped specimen for biaxial-tensile fatigue testing, Sept., 287

Journal of Testing and Evaluation
Subject Index
Volume 24, 1996

A

Air permeability
Prediction of single-layer fabric air permeability by statistical modeling (Epps, HH), Jan., 26

Aneurysm clips
Titanium cerebral aneurysm clips: characterization and performance in magnetic resonance imaging and computed tomography (Ho, JC, Wu, CY, Carron, MJ, Maughan, KP, and Schmidt, FJ), March, 85

Aqueous phase modifier
Development of analytical methods for quantification of residual powder on 'powderless' latex gloves (Chen, ET, Hughes-Dillon, K, and Schroeder, LW), July, 229

Arc bend specimens
Fracture mechanics expressions for the standard chord-supported arc bend specimen (Tarafder, S, Tarafder, M, and Ranganath, VR), March, 73

Audit
Evolution of the internal quality audit at Ford Motor Company's Central Laboratory (Terjimanian, A and Kelly, CJ), Jan., 37

Azadirachtin
Extraction and determination of Azadirachtin from soil and insects by supercritical fluid extraction (Brooks, MW, Roy, S, Uden, PC, and Vittum, P), May, 149

B

Bias testing
Bias testing: myths, misconceptions, and mistakes (Gould, G), Sept., 333

Biaxial fatigue
Optimal design of a disk-shaped specimen for biaxial-tensile fatigue testing (Zouani, A, Bui-Quoc, T, and Bernard, M), Sept., 287

Book reviews
Building Design and Construction Handbook (Fifth Edition) by Merritt and Ricketts (O'Connor, TF), July, 272
The Contractor's Dictionary of Equipment, Tools, and Techniques by Webster (O'Connor, TF), May, 203
Engineering Materials 3: Materials Failure Analysis (Case Studies and Design Implications) by Jones (Scott, CG and Riga, AT), Jan., 57
Integrating Reliability into Microelectronics Manufacturing by Christou (Gupta, DC), Jan., 56
International Advances in Nondestructive Testing by McGonnagle (Scott, CG and Riga, AT), Jan., 57
Introduction to Engineering Materials: Behavior, Properties, and Selection, Engineered Materials Series 2 by Murray (Riga, AT and Scott, CG), March, 140
The Macmillan Dictionary of Measurement by Darton and Clark (Petersen, DR), Nov., 427
The Physics Quick Reference Guide by Cohen (Petersen, DR), July, 273
Scanning Tunnel Microscopy and Spectroscopy: Theory, Techniques, and Applications by Bonnell (Phelps, AW), Sept., 347
Simplified Building Design for Wind and Earthquake Forces, Third Edition by Ambrose and Vergun (O'Connor, TF), March, 142
Successful Management of the Analytical Laboratory by Milner (Riga, AT and Scott, CG), March, 141
Superconducting Levitation: Applications to Bearings and Magnetic Transportation by Moon and Chang (Vahradian, HM), May, 204
Thermal Analysis of Materials (Materials Engineering Series 5) by Speyer (Riga, AT and Scott, CG), Sept., 348

Breaking strength
Color change as a predictor of strength loss in PFD cover fabrics (Epps, HH and Leonas, KK), Nov., 392

Bridge construction
Cyclic tests on high-strength prestressed concrete frames (Mo, YL and Hwang, WL), May, 168

Building stone
Review of durability testing of building stone with annotated bibliography (Carr, DD, Strickland, J, McDonald, WH, and Bortz, S), Sept., 324

C

Certification
National Institute for Certification in Engineering Technologies Certification: addressing the technician component of laboratory quality (Pao, C, Clark, MA, and Antrim, JD), Jan., 45

Chemical exposure
Corrosiveness of chromate exposure to steel embedded in soil or concrete (Poston, RW, Galitz, CL, and Yates, JS), Nov., 397

Chlorides
Corrosiveness of chromate exposure to steel embedded in soil or concrete (Poston, RW, Galitz, CL, and Yates, JS), Nov., 397

Chromatography
Eliminating wasteful "cut and try" procedures in gas chromatography method development using computer modeling (Annino, R and Villalobos, R), May, 143
Extraction and determination of Azadirachtin from soil and insects by supercritical fluid extraction (Brooks, MW, Roy, S, Uden, PC, and Vittum, P), May, 149

Clad metal
Commercial applications of zirconium explosion clad (Banker, JG), March, 91

Closures
Leakers as a function of closure type in gallon-size plastic bottles in simulated small parcel test environment (Singh, SP and Syal, VP), July, 241

Coal
Bias testing: myths, misconceptions, and mistakes (Gould, G), Sept., 333

Coefficient of friction
Comparison of walkway-safety tribometers (Marpet, M), July, 245
Required coefficient of friction versus walking speed: potential influences of footwear and walkway surfaces (Fendley, AE and Marpet, MI), Nov., 359

Composites
Effect of fiber coating on the temperature dependence of the elastic and anelastic properties of a fiber-reinforced borosilicate glass matrix composite (Wolfenden,

A, Thomas, HM, Thomas, V, and Chawla, KK), July, 237
Robust design of the Iosipescu shear test specimen for composites (Chiang, YJ), Jan., 1

Computed tomography (CT)
Titanium cerebral aneurysm clips: characterization and performance in magnetic resonance imaging and computed tomography (Ho, JC, Wu, CY, Carron, MJ, Maughan, KP, and Schmidt, FJ), March, 85

Computer-aided solutions
Eliminating wasteful "cut and try" procedures in gas chromatography method development using computer modeling (Annino, R and Villalobos, R), May, 143

Concrete
Cyclic tests on high-strength prestressed concrete frames (Mo, YL and Hwang, WL), May, 168
Fly ash as a pre-filter material for the retention of lead ions (Pandian, NS, Rajasekhar, C, and Sridharan, A), May, 181

Condom tests
Two parameters limiting the sensitivity of laboratory tests of condoms as viral barriers (Lytle, CD, Routson, LB, Thomas, DP, Regnault, WF, and Cyr, WH), Sept., 279

Construction materials
Development and application of a quality system standard for construction materials testing laboratories (Spellerberg, PA, Trimm, WL, and Pielert, JH), Jan., 49

Corrosion (metals)
Corrosiveness of chromate exposure to steel embedded in soil or concrete (Poston, RW, Galitz, CL, and Yates, JS), Nov., 397
Expanded windows for titanium use in the pulp/paper peroxide bleach plant (Schutz, RW and Xiao, M), March, 119

Creep
Creep lifetime under constant load and constant stress: theory and experiment (Aktaa, J and Schinke, B), July, 212
Creep testing of steels at very high temperatures (Lindblom, J, Seitisleam, F, and Henderson, PJ), Sept., 329

Cyclic loading
Fatigue under stress cycling with nonzero means (Gong, Y and Norton, MP), July, 263

D

Damage mechanics
Creep rupture investigation of 63Sn-37Pb solder by experiments and damage mechanics (Ju, S-H, Sandor, B, and Plesha, ME), Nov., 411

Depth measurement
Improved indentation-depth method of hardness measurement (Ezhov, YV), Sept., 320

Dimension stone
Review of durability testing of building stone with annotated bibliography (Carr, DD, Strickland, J, McDonald, WH, and Bortz, S), Sept., 324

Drop height
Measurement and analysis of the overnight small package shipping environment for Federal Express and United Parcel Service (Singh, SP and Cheema A), July, 205

Durability
Review of durability testing of building stone with annotated bibliography (Carr, DD, Strickland, J, McDonald, WH, and Bortz, S), Sept., 324

E

Efflorescence
Evaluation of test methods and environmental conditions to promote efflorescence formation under laboratory conditions (Vickers, T and Moukwa, M), March, 80

Elevated temperatures
Determination of the geometric profile and stress/strain state in the necked region during inelastic deformation at elevated temperatures using a non-contact measurement technique (Gaudig, W, Bothe, K, Bhaduri, AK, and Maile, K), May, 161

Explosively formed penetrator (EFP) liner
Empirical determination of the manufacturing processes which affect EFP liner performance (Faccini, EC and Woodbury, HA), March, 123

F

Fabric handle
Objective assessment of fabric handle in fabrics treated with flame retardants (Kim, JO and Slaten, BL), July, 223

Fatigue
Creep rupture investigation of 63Sn-37Pb solder by experiments and damage mechanics (Ju, S-H, Sandor, B, and Plesha, ME), Nov., 411
Effects of fatigue on fragility testing and the damage boundary curve (Burgess, G), Nov., 419
Fatigue under stress cycling with nonzero means (Gong, Y and Norton, MP), July, 263
Optimal design of a disk-shaped specimen for biaxial-tensile fatigue testing (Zouani, A, Bui-Quoc, T, and Bernard, M), Sept., 287

Fiber coatings
Effect of fiber coating on the temperature dependence of the elastic and anelastic properties of a fiber-reinforced borosilicate glass matrix composite (Wolfenden, A, Thomas, HM, Thomas, V, and Chawla, KK), July, 237

Finite element method
Robust design of the Iosipescu shear test specimen for composites (Chiang, YJ), Jan., 1

Fly ash
Fly ash as a pre-filter material for the retention of lead ions (Pandian, NS, Rajasekhar, C, and Sridharan, A), May, 181

Force plate
Comparison of walkway-safety tribometers (Marpet, M), July, 245

Formic acid
Performance of zirconium and zirconium alloys in organics (Yau, T-L), March, 110

Fracture mechanics
Fracture mechanics expressions for the standard chord-supported arc bend specimen (Tarafder, S, Tarafder, M, and Ranganath, VR), March, 73
Fracture test method for Mode I fracture of thin metal materials (Cotterell, B, Sim, MC, Amrutharaj, G, and Teoh, SH), Sept., 316

Fracture mechanics expressions
Fracture mechanics expressions for the standard chord-supported arc bend specimen (Tarafder, S, Tarafder, M, and Ranganath, VR), March, 73

Fracture testing
Comparison of *R*-curve methodologies for ranking the toughness of aluminum alloys (Reynolds, AP), Nov., 406

Friction
High-resolution force plate analysis of utilized slip resistance in human walking (Buczek, FL, Jr. and Banks, SA), Nov., 353
Slip resistance characteristics of footwear solings assessed using the SATRA friction tester (Wilson, M), Nov., 377

G–H

Gas
Eliminating wasteful "cut and try" procedures in gas chromatography method

development using computer modeling (Annino, R and Villalobos, R), May, 143

Hand
Objective assessment of fabric handle in fabrics treated with flame retardants (Kim, JO and Slaten, BL), July, 223

Hardness testing
Minimum thickness requirements for Rockwell hardness testing (Heberling, TG, Fee, AR, and Tobolski, EL), March, 131

High-strength concrete
Cyclic tests on high-strength prestressed concrete frames (Mo, YL and Hwang, WL), May, 168

Hydrogen peroxide
Expanded windows for titanium use in the pulp/paper peroxide bleach plant (Schutz, RW and Xiao, M), March, 119

I–J

Indentation hardness
Improved indentation-depth method of hardness measurement (Ezhov, YV), Sept., 320

Initial deformation
Initial deformation during small punch testing (Cheon, JS and Kim, IS), July, 255

Iosipescu test specimens
Robust design of the Iosipescu shear test specimen for composites (Chiang, YJ), Jan., 1

Joints
Testing and evaluation of metal-plate-connected wood truss joints (Vatovec, M, Gupta, R, and Miller, T), March, 63

L

Laboratory accreditation
Development and application of a quality system standard for construction materials testing laboratories (Spellerberg, PA, Trimm, WL, and Pielert, JH), Jan., 49
Evolution of the internal quality audit at Ford Motor Company's Central Laboratory (Terjimanian, A and Kelly, CJ), Jan., 37
National Institute for Certification in Engineering Technologies Certification: addressing the technician component of laboratory quality (Pao, C, Clark, MA, and Antrim, JD), Jan., 45
Third-party inspection agency response to changing needs (Kay, A), Jan., 32

Large stone mixes
Precision of Marshall stability and flow test using 6-in. (152.4-mm) diameter specimens (Kandhal, PS, Wu, Y, Parker, F, Jr., and Spellerberg, PA), Jan., 12

Latex condom
Two parameters limiting the sensitivity of laboratory tests of condoms as viral barriers (Lytle, CD, Routson, LB, Thomas, DP, Regnault, WF, and Cyr, WH), Sept., 279

Latex gloves
Development of analytical methods for quantification of residual powder on 'powderless' latex gloves (Chen, ET, Hughes-Dillon, K, and Schroeder, LW), July, 229

Life prediction
Fatigue under stress cycling with nonzero means (Gong, Y and Norton, MP), July, 263

Lifetime
Creep lifetime under constant load and constant stress: theory and experiment (Aktaa, J and Schinke, B), July, 212

Light alloys
Comparison of *R*-curve methodologies for ranking the toughness of aluminum alloys (Reynolds, AP), Nov., 406

Long-term behavior
Time-dependent bending properties of lumber (Kliger, IR and Pellicane, PJ), May, 187

M

Marshall stability
Precision of Marshall stability and flow test using 6-in. (152.4-mm) diameter specimens (Kandhal, PS, Wu, Y, Parker, F, Jr., and Spellerberg, PA), Jan., 12

Masonry
Evaluation of test methods and environmental conditions to promote efflorescence formation under laboratory conditions (Vickers, T and Moukwa, M), March, 80

Matchstick sensors
Accuracy of wood resistance sensors for measurement of humidity (Carll, C and TenWolde, A), May, 154

Mechanical damping
Effect of fiber coating on the temperature dependence of the elastic and anelastic properties of a fiber-reinforced borosilicate glass matrix composite (Wolfenden, A, Thomas, HM, Thomas, V, and Chawla, KK), July, 237

Mechanical properties
New approach to measuring transverse properties of structural tubing by a ring test (Arsene, S and Bai, J), Nov., 386

Mechanical testing
Creep lifetime under constant load and constant stress: theory and experiment (Aktaa, J and Schinke, B), July, 212
Critical evaluation of the performance of optical fiber sensors for monitoring dynamic strains (Singh, RP and Shukla, A), Sept., 295
Determination of the geometric profile and stress/strain state in the necked region during inelastic deformation at elevated temperatures using a non-contact measurement technique (Gaudig, W, Bothe, K, Bhaduri, AK, and Maile, K), May, 161
Minimum thickness requirements for Rockwell hardness testing (Heberling, TG, Fee, AR, and Tobolski, EL), March, 131
Structure and property evaluation of large-diameter spray-formed superalloy piping (Moran, AL and Rebis, RE), Sept., 302

Metallography
Improved indentation-depth method of hardness measurement (Ezhov, YV), Sept., 320

Mode I fracture testing
Fracture test method for Mode I fracture of thin metal materials (Cotterell, B, Sim, MC, Amrutharaj, G, and Teoh, SH), Sept., 316

N

NICET
National Institute for Certification in Engineering Technologies Certification: addressing the technician component of laboratory quality (Pao, C, Clark, MA, and Antrim, JD), Jan., 45

Nondestructive testing
Preliminary characterization of thermal diffusivity for carbon-carbon composites through pulsed video thermal imaging (Kulkarni, MR and Brady, RP), Sept., 275

Nonlinear regression
Prediction of single-layer fabric air permeability by statistical modeling (Epps, HH), Jan., 26

Normality
Bias testing: myths, misconceptions, and mistakes (Gould, G), Sept., 333

Nuclear technology
Initial deformation during small punch testing (Cheon, JS and Kim, IS), July, 255

O

Optical fiber sensors
Critical evaluation of the performance of optical fiber sensors for monitoring

dynamic strains (Singh, RP and Shukla, A), Sept., 295

Organics
Performance of zirconium and zirconium alloys in organics (Yau, T-L), March, 110

Oxidation
Creep testing of steels at very high temperatures (Lindblom, J, Seitisleam, F, and Henderson, PJ), Sept., 329

P

Packaging
Effects of fatigue on fragility testing and the damage boundary curve (Burgess, G), Nov., 419
Leakers as a function of closure type in gallon-size plastic bottles in simulated small parcel test environment (Singh, SP and Syal, VP), July, 241
Measurement and analysis of the overnight small package shipping environment for Federal Express and United Parcel Service (Singh, SP and Cheema A), July, 205

Personal flotation devices
Color change as a predictor of strength loss in PFD cover fabrics (Epps, HH and Leonas, KK), Nov., 392

pH
Fly ash as a pre-filter material for the retention of lead ions (Pandian, NS, Rajasekhar, C, and Sridharan, A), May, 181

Piping
Structure and property evaluation of large-diameter spray-formed superalloy piping (Moran, AL and Rebis, RE), Sept., 302

Plane surveying
Modified theodolite instrument: conceptual work (Obaidat, MT and Al-Smadi, ZA), May, 194

Plastic bottles
Leakers as a function of closure type in gallon-size plastic bottles in simulated small parcel test environment (Singh, SP and Syal, VP), July, 241

Plate
Ti roll-clad plate: more cost-effective plate products for utilizing titanium and zirconium alloys in chemical processes (Schutz, RW), March, 96

Polishes
High-resolution force plate analysis of utilized slip resistance in human walking (Buczek, FL, Jr. and Banks, SA), Nov., 353
International symposium on slip resistance: The interface of man, footwear, and walking surfaces (Sacher, A and Owens, JM), Nov., 351
Required coefficient of friction versus walking speed: potential influences of footwear and walkway surfaces (Fendley, AE and Marpet, MI), Nov., 359
Slip resistance characteristics of footwear solings assessed using the SATRA friction tester (Wilson, M), Nov., 377
Surface roughness of footwear soling materials: relevance to slip resistance (Rowland, FJ, Jones, C, and Manning, DP), Nov., 368

Prestressed concrete
Cyclic tests on high-strength prestressed concrete frames (Mo, YL and Hwang, WL), May, 168

Protective clothing
Objective assessment of fabric handle in fabrics treated with flame retardants (Kim, JO and Slaten, BL), July, 223
Two parameters limiting the sensitivity of laboratory tests of condoms as viral barriers (Lytle, CD, Routson, LB, Thomas, DP, Regnault, WF, and Cyr, WH), Sept., 279

Pulp/paper
Expanded windows for titanium use in the pulp/paper peroxide bleach plant (Schutz, RW and Xiao, M), March, 119

Pulsed video thermography (PVT)
Preliminary characterization of thermal diffusivity for carbon-carbon composites through pulsed video thermal imaging (Kulkarni, MR and Brady, RP), Sept., 275

Q

Quality assurance
Development and application of a quality system standard for construction materials testing laboratories (Spellerberg, PA, Trimm, WL, and Pielert, JH), Jan., 49
Evolution of the internal quality audit at Ford Motor Company's Central Laboratory (Terjimanian, A and Kelly, CJ), Jan., 37
National Institute for Certification in Engineering Technologies Certification: addressing the technician component of laboratory quality (Pao, C, Clark, MA, and Antrim, JD), Jan., 45

R

***R* curve**
Comparison of *R*-curve methodologies for ranking the toughness of aluminum alloys (Reynolds, AP), Nov., 406

Reactive alloys
Development and applications of titanium alloy SP-700 with high formability (Ogawa, A, Niikura, M, Ouchi, C, Minikawa, K, and Yamada, M), March, 100
Performance of zirconium and zirconium alloys in organics (Yau, T-L), March, 110

Reactive metals
Commercial applications of zirconium explosion clad (Banker, JG), March, 91
Empirical determination of the manufacturing processes which affect EFP liner performance (Faccini, EC and Woodbury, HA), March, 123
Introduction to Journal section on industrial applications of titanium and zirconium (Grauman, JS and Webster, RT), March, 84
Ti roll-clad plate: more cost-effective plate products for utilizing titanium and zirconium alloys in chemical processes (Schutz, RW), March, 96
Titanium cerebral aneurysm clips: characterization and performance in magnetic resonance imaging and computed tomography (Ho, JC, Wu, CY, Carron, MJ, Maughan, KP, and Schmidt, FJ), March, 85

Regulatory compliance
Third-party inspection agency response to changing needs (Kay, A), Jan., 32

Relative humidity
Accuracy of wood resistance sensors for measurement of humidity (Carll, C and TenWolde, A), May, 154
Evaluation of test methods and environmental conditions to promote efflorescence formation under laboratory conditions (Vickers, T and Moukwa, M), March, 80

Residual glove powder
Development of analytical methods for quantification of residual powder on 'powderless' latex gloves (Chen, ET, Hughes-Dillon, K, and Schroeder, LW), July, 229

Retention
Fly ash as a pre-filter material for the retention of lead ions (Pandian, NS, Rajasekhar, C, and Sridharan, A), May, 181

Road paving materials
Precision of Marshall stability and flow test using 6-in. (152.4-mm) diameter specimens (Kandhal, PS, Wu, Y, Parker, F, Jr., and Spellerberg, PA), Jan., 12

Rubber
Development of analytical methods for quantification of residual powder on 'powderless' latex gloves (Chen, ET, Hughes-Dillon, K, and Schroeder, LW), July, 229

S

Safety (footwear)
Comparison of walkway-safety tribometers (Marpet, M), July, 245

Sample size
Bias testing: myths, misconceptions, and mistakes (Gould, G), Sept., 333

Sensory evaluation
Accuracy of wood resistance sensors for measurement of humidity (Carll, C and TenWolde, A), May, 154

Shock
Measurement and analysis of the overnight small package shipping environment for Federal Express and United Parcel Service (Singh, SP and Cheema A), July, 205

Shock fragility
Effects of fatigue on fragility testing and the damage boundary curve (Burgess, G), Nov., 419

Sliding wear
Unlubricated sliding wear of steels: the contact conditions in the sliding zone (Bian, S, Maj, S, and Borland, DW), Jan., 12

Slip resistance
High-resolution force plate analysis of utilized slip resistance in human walking (Buczek, FL, Jr. and Banks, SA), Nov., 353
International symposium on slip resistance: the interface of man, footwear, and walking surfaces (Sacher, A and Owens, JM), Nov., 351
Slip resistance characteristics of footwear solings assessed using the SATRA friction tester (Wilson, M), Nov., 377
Surface roughness of footwear soling materials: relevance to slip resistance (Rowland, FJ, Jones, C, and Manning, DP), Nov., 368

Small parcel shipping
Leakers as a function of closure type in gallon-size plastic bottles in simulated small parcel test environment (Singh, SP and Syal, VP), July, 241

Small punch test
Initial deformation during small punch testing (Cheon, JS and Kim, IS), July, 255

Solder
Creep rupture investigation of 63Sn-37Pb solder by experiments and damage mechanics (Ju, S-H, Sandor, B, and Plesha, ME), Nov., 411

SP-700 alloy
Development and applications of titanium alloy SP-700 with high formability (Ogawa, A, Niikura, M, Ouchi, C, Minikawa, K, and Yamada, M), March, 100

Spray forming
Structure and property evaluation of large-diameter spray-formed superalloy piping (Moran, AL and Rebis, RE), Sept., 302

Steels
Creep testing of steels at very high temperatures (Lindblom, J, Seitisleam, F, and Henderson, PJ), Sept., 329
Unlubricated sliding wear of steels: the contact conditions in the sliding zone (Bian, S, Maj, S, and Borland, DW), Jan., 12

Stiffness
Objective assessment of fabric handle in fabrics treated with flame retardants (Kim, JO and Slaten, BL), July, 223

Strain gages
Critical evaluation of the performance of optical fiber sensors for monitoring dynamic strains (Singh, RP and Shukla, A), Sept., 295

Stress-skin panels
Time-dependent bending properties of lumber (Kliger, IR and Pellicane, PJ), May, 187

Supercritical fluid extraction
Extraction and determination of Azadirachtin from soil and insects by supercritical fluid extraction (Brooks, MW, Roy, S, Uden, PC, and Vittum, P), May, 149

Surface roughness
Surface roughness of footwear soling materials: relevance to slip resistance (Rowland, FJ, Jones, C, and Manning, DP), Nov., 368

Surveying
Modified theodolite instrument: conceptual work (Obaidat, MT and Al-Smadi, ZA), May, 194

T

T66/103
Surface roughness of footwear soling materials: relevance to slip resistance (Rowland, FJ, Jones, C, and Manning, DP), Nov., 368

Taguchi method
Empirical determination of the manufacturing processes which affect EFP liner performance (Faccini, EC and Woodbury, HA), March, 123

Temperature pattern
Diagnosis of machinery by analysis of running temperature data (Segal, L), July, 268

Tension testing
Determination of the geometric profile and stress/strain state in the necked region during inelastic deformation at elevated temperatures using a non-contact measurement technique (Gaudig, W, Bothe, K, Bhaduri, AK, and Maile, K), May, 161

Test procedures
Evaluation of test methods and environmental conditions to promote efflorescence formation under laboratory conditions (Vickers, T and Moukwa, M), March, 80

Testing machines
Optimal design of a disk-shaped specimen for biaxial-tensile fatigue testing (Zouani, A, Bui-Quoc, T, and Bernard, M), Sept., 287

Textiles
Color change as a predictor of strength loss in PFD cover fabrics (Epps, HH and Leonas, KK), Nov., 392
Prediction of single-layer fabric air permeability by statistical modeling (Epps, HH), Jan., 26

Theodolite
Modified theodolite instrument: conceptual work (Obaidat, MT and Al-Smadi, ZA), May, 194

Thermal diagnosis
Diagnosis of machinery by analysis of running temperature data (Segal, L), July, 268

Thermal diffusivity
Preliminary characterization of thermal diffusivity for carbon-carbon composites through pulsed video thermal imaging (Kulkarni, MR and Brady, RP), Sept., 275

Thermal measurements
Diagnosis of machinery by analysis of running temperature data (Segal, L), July, 268

Thickness
Minimum thickness requirements for Rockwell hardness testing (Heberling, TG, Fee, AR, and Tobolski, EL), March, 131

Thin materials
Fracture test method for Mode I fracture of thin metal materials (Cotterell, B, Sim, MC, Amrutharaj, G, and Teoh, SH), Sept., 316

Third-party inspection
Third-party inspection agency response to changing needs (Kay, A), Jan., 32

Titanium
Introduction to Journal section on industrial applications of titanium and zirconium (Grauman, JS and Webster, RT), March, 84

Ti roll-clad plate: more cost-effective plate products for utilizing titanium and zirconium alloys in chemical processes (Schutz, RW), March, 96
Titanium cerebral aneurysm clips: characterization and performance in magnetic resonance imaging and computed tomography (Ho, JC, Wu, CY, Carron, MJ, Maughan, KP, and Schmidt, FJ), March, 85

Titanium alloy
Development and applications of titanium alloy SP-700 with high formability (Ogawa, A, Niikura, M, Ouchi, C, Minikawa, K, and Yamada, M), March, 100

Top-piece
Required coefficient of friction versus walking speed: potential influences of footwear and walkway surfaces (Fendley, AE and Marpet, MI), Nov., 359

Transverse mechanical properties
New approach to measuring transverse properties of structural tubing by a ring test (Arsene, S and Bai, J), Nov., 386

Trusses
Testing and evaluation of metal-plate-connected wood truss joints (Vatovec, M, Gupta, R, and Miller, T), March, 63

Tubular pipes
New approach to measuring transverse properties of structural tubing by a ring test (Arsene, S and Bai, J), Nov., 386

W

Walking surfaces
International symposium on slip resistance: the interface of man, footwear, and walking surfaces (Sacher, A and Owens, JM), Nov., 351
Required coefficient of friction versus walking speed: potential influences of footwear and walkway surfaces (Fendley, AE and Marpet, MI), Nov., 359

Walkway safety
Comparison of walkway-safety tribometers (Marpet, MI), July, 245

Wear testing
Unlubricated sliding wear of steels: the contact conditions in the sliding zone (Bian, S, Maj, S, and Borland, DW), Jan., 12

Wood
Testing and evaluation of metal-plate-connected wood truss joints (Vatovec, M, Gupta, R, and Miller, T), March, 63
Time-dependent bending properties of lumber (Kliger, IR and Pellicane, PJ), May, 187

Y–Z

Young's modulus
Effect of fiber coating on the temperature dependence of the elastic and anelastic properties of a fiber-reinforced borosilicate glass matrix composite (Wolfenden, A, Thomas, HM, Thomas, V, and Chawla, KK), July, 237

Zirconium
Commercial applications of zirconium explosion clad (Banker, JG), March, 91
Introduction to Journal section on industrial applications of titanium and zirconium (Grauman, JS and Webster, RT), March, 84
Performance of zirconium and zirconium alloys in organics (Yau, T-L), March, 110
Ti roll-clad plate: more cost-effective plate products for utilizing titanium and zirconium alloys in chemical processes (Schutz, RW), March, 96
